

Team Meeting: Strong Positions for 2Q25 FC Publications

29 May, 2025

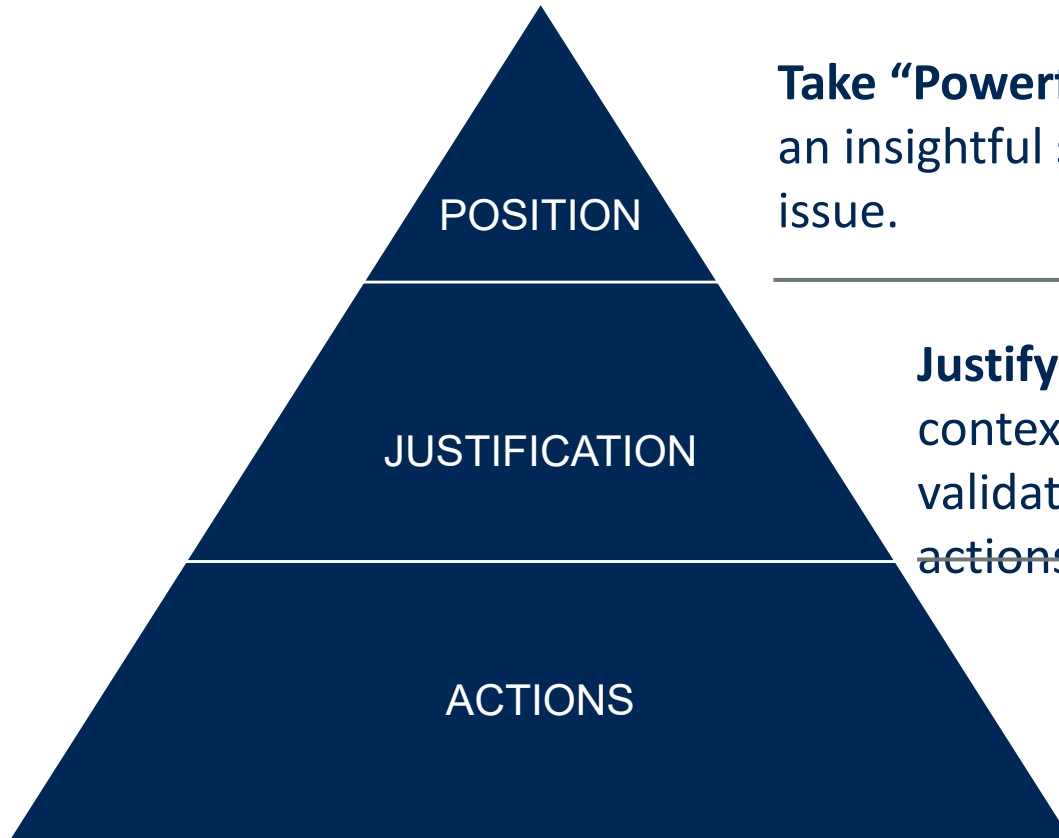

Coaching to PJA

Position, Justification, Actions Framework

TM Exchange

Version 1.0
Q1, 2025

PJA: Position, Justification, Actions

Take “Powerful” Positions! Clearly articulate an insightful stance on an important client issue.

Justify Your Positions; provide the context, logic and evidence that validates the position and spurs actions

Recommend Specific Actions; client response to the position, to achieve greater success in their role

Taking Powerful Positions

Components of a Powerful Position Statement

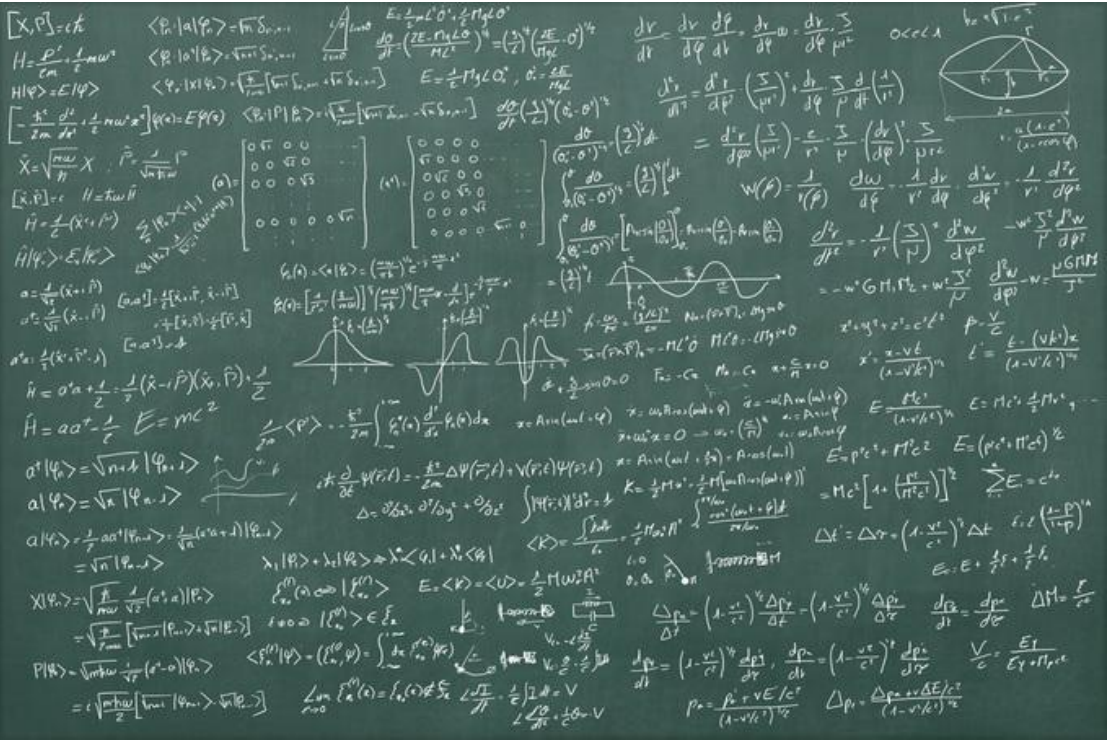

✓ Powerful positions are declarative statements providing Gartner **judgments** on the **current or future state or consequences** of **important issues** that matter to our clients' success in their roles.

The primary goals of a position statement are to:

- Command reader attention
- Surface an unavoidable and irresistible challenge or opportunity
- Motivate the desire to act

But.... It is also a creative Art

Part Science

Part Art

Find the Drama!

Crafting Positions:

- **3 Good Examples**
- **3 Not so Good**

Example 1 of a Powerful Position Statement

Services Companies that Build the Best Hyper-synthetic Data Capabilities will Win in the AI Race.

Components (the science)

- Important issue: —→ The AI race
- Judgement: —→ Hyper-synthetic will win the race!
- State: —→ build best hyper-synthetic

Drama (the art)

- Attention: —→ Will win! I don't want to be a loser!
- Irresistible: —→ I don't even know what hyper-synthetic data is.
- Motivation: —→ I better build hyper-synthetic data capabilities

Example 2 of a Powerful Position Statement

GenAI is an Extinction Level Event for Existing Business Application Software.

Components (the science)

- Important issue: —→ GenAI and application software
- Judgement: —→ This is an extinction level event.
- State: —→ Existing app software

Drama (the art)

- Attention: —→ This is extinction level!
- Irresistible: —→ This is extinction level! I don't want to be a dinosaur!
- Motivation: —→ I better change my app software.

Example 3 of a Powerful Position Statement

Domain Specific Language Models (DSLMS), not LLMs, are the Future of AI in Business.

Components (the science)

- Important issue: → LLMs
- Judgement: → LLMs are not it
- State: → The future of AI in business

Drama (the art)

- Attention: → What I thought was the future, isn't!
- Irresistible: → What is a DSLM?
- Motivation: → I better figure out how DSLMs matter to my business.

Example Position Statement #4

Define Your Domain-Specific AI Product Strategy to Win the AI Race.

Components (the science)

- Important issue: —→ Winning the AI Race
- Judgement: —————→ Strategy will win
- State: —————→ Defined strategy?

Drama (the art)

- Attention: —————→ I want to win the AI race!
- Irresistible: —————→ I have an AI strategy for my industry (directive vs. declarative)
- Motivation: —————→ I'm good here.

Example Position Statement #4 - Modified

In the AI race, a CPO with an AI product strategy that targets too many domains, runs a high risk of losing them all.

Components (the science)

- Important issue: —→ Winning the AI Race
- Judgement: —→ Too broad a strategy is high risk
- State: —→ AI product strategy that is too broad

Drama (the art)

- Attention: —→ I want to win. Am I at high risk of losing?
- Irresistible: —→ How many is too many?
- Motivation: —→ I need to make sure I'm not going after too many?

Example Position Statement #5

The Disruptive Impact of Domain-Specific Language Models on the IT Services Market

Components (the science)

- Important issue: —→ IT services market disruption
- Judgement: —→ There is at least a little disruption?
- State: —→ Not quite clear

Drama (the art)

- Attention: —→ Disruptive impact
- Irresistible: —→ Disruptive
- Motivation: —→ I need to need to check on its disruptive impact.

Example Position Statement #5 - Modified

Domain-Specific Language Models are a Disruptive Future Opportunity in a Woefully Unprepared IT Services Market

Components (the science)

- Important issue: —→ IT services market disruption
- Judgement: —→ woefully unprepared for a future opportunity
- State: —→ DSLMs will disrupt and create a competitive opportunity

Drama (the art)

- Attention: —→ Future opportunity, woefully unprepared... good and bad?
- Irresistible: —→ Yikes! Are we woefully unprepared
- Motivation: —→ I need to determine if DSLMs are a threat or an opportunity

Example Position Statement #6

The New C-Suite AI Advisory Cabinet for Tech CEOs

Components (the science)

- Important issue: —→ AI Advisory Cabinet?
- Judgement: —→ Missing (is it good or bad?)
- State: —→ Something new is happening

Drama (the art)

- Attention: —→ New and something I don't have
- Irresistible: —→ What is an AI advisory cabinet?
- Motivation: —→ Should I care about an AI advisory cabinet?

Example Position Statement #6 - Modified

Tech CEOs Who Pursue C-Suite AI Advisory Cabinets Will Invest Significant Time and Money for Bad Counsel

Components (the science)

- Important issue: —→ AI Advisory Cabinet effectiveness
- Judgement: —→ Waste of time and money for bad advice
- State: —→ AI advisory cabinets are significantly over-hyped

Drama (the art)

- Attention: —→ We don't have time and money to waste. Bad advice.
- Irresistible: —→ Why is this so bad? I may need to argue against it
- Motivation: —→ I need to make sure my CEO knows about this

Assignment: Two Big Position Statements per Manager

- Work with your teams
- Deliver two big position statements that capture the most important issues your clients are facing or will face
- They should be the best positions you have that are strong enough for Gartner to promote externally. This is not a drill.
- Use the following two slides as examples
- Make your own slide (if you can't point to a research note then make up a working title)

AI Infrastructure	Algorithm-Aligned Silicon Architectures Supplant GPUs for Highly Efficient AI Model Operations	Emerging Tech: Top 3 Disruptors for AI Compute Performance for 2025

Justifying Powerful Positions

Components of a Well-Presented Justification

- ✓ The justification paragraphs explain the situation and its importance (context).
- ✓ They provide evidence and logic that establishes validity of your position.
- ✓ It sets up the reasoning for why action is necessary.

Sources of evidence:

- **Data-driven fact-base** such as VC investment data or primary research survey data
- Real-world case studies such as vendor examples, peer reviews, inquiry and implementation **case-based research**.
- Prior art source references such as academic papers, Gartner published research, and articles from reputable and trusted sources.

Bottom Line: The justification must convince the reader that your position(s) are valid and that they merit action.

Coaching Best Practices Checklist

-
- ☒ It needs to follow the content type structure (if applicable).
 - ☒ Make sure the proper context is set for the reader to care and understand.
 - ☒ It should be as concise as possible with fewer clear arguments rather than long rationalizations. Don't oversell and move detail into the notes.
 - ☒ It needs to connect the positions to the recommended actions.
-

We Recommend Actions in Response to our Positions

Actions are How We Recommend Clients Respond

- ✓ Recommended actions list out how we believe clients should respond to our stated positions to achieve success in their roles.

How Clients Should Respond to Our Positions

Key Characteristics of Actions:

- ✓ Cover “how to” level actions that address the challenge or opportunity in the position statements.
- ✓ Are non-obvious and meaningful in impact.
- ✓ Include the results achieved if actions are successfully implemented

Bottom Line: Recommended actions should provide previously unknown or little-known remedies to the challenge\opportunity outlined in the position statement.

Coaching Checklist for Recommended Actions

- ✓ Help make the recommended actions specific with a focus on what they need to do differently to succeed in the new market dynamics.
- ✓ Ensure the actions are insightful actions that are little known, unconventional or often ignored
- ✓ Make sure the positive outcomes of taking the action are explicitly stated.
- ✓ Balance the actions with the positions and justifications that precede them
