

Market Insight

Purpose

Client Utility - Markets and Vendors

Market Insights is designed as a short-form content piece, making it easy to consume and understand. The concise yet informative segments provide valuable context, enriching clients' overall market understanding enabling quicker, more informed decision-making.

Market Insights examine impacts and implications about the market or technology under examination. They include a conclusion section to discuss what the affected vendors or Product Leaders should do about what you've told them.

What You Need to Know

- Only used when analysis does not fit into the more defined High Tech and Invest (HTI) role-based content types: such as Data View - Detailed, First 100 Days, Impact Appraisal, Market Opportunity Map or Top Practices.
- Clearly identify impact/ implications for HTIs or Product Leaders.
- Analysis should be molded into a single argument using a simple, clear structure that clearly identifies the audience.

[Document Update History](#) summarizes recent changes in this document.

KEY INFORMATION

Research Model:
A&E

Alternatives:
[Impact Appraisal](#): When a single event/trend/technology has occurred and you wish to focus narrowly on the implications.

Contextualization Options:
Branch (Invest, China Translation),
[Perspective](#), [Variant](#)

BTI Studio:
[Publishing 2.0 Resources](#)
[Launchpad](#)

Good Examples:
[AI Vendor Race: The AI Investment Framework: How Growth Tech CEOs Win](#)
[AI Vendor Race: Combining Real-Time Data With Explainable AI Is the Future of OCP](#)

Lifecycle:
[Content Type Life Cycle](#)
[Management Options](#)

Complex Vendor Lead Review:
Required if covering [these vendors](#).

External Review:
If more-than-passing reference to vendor/product: 2 business days

Market Insight

How to Write, Structure and Style a Market Insight

The Section Heading column specifies whether each section is required or optional and indicates whether or not the heading in the CPP canvas will be published on g.com.

Section Heading	How to Write, Structure and Style It
Title Required <i>Header won't publish</i>	No set structure, but there are three suggested structures, based on your use. • For technology analysis: ◦ "Technology Insight: [technology name], [period]" ◦ Example: <i>Technology Insight: Generative AI, 2Q24</i> • For industry analysis: ◦ "[Industry] Insight: [description]" ◦ Example: <i>Insurance Insight: How to Position and Differentiate CDN and Digital Enablement Services</i> • For role-focused analysis: ◦ [Role] Insight: [description] ◦ Example: <i>Product Manager Insight: Leverage Application Software Ecosystems to Deliver Rapid Innovation</i> • Ideal Length: 20 to 65 characters (including spaces)
Summary Required <i>Header won't publish</i>	Contextualize your research in 2-3 sentences, using key search terms where possible. • In 2-3 sentences, convey the specific challenge, opportunity or situation that your research addresses. Then, outline how this research will help the approved target role. • Length: 300 characters (including spaces) HARD LIMIT
Executive Summary Required <i>Header won't publish</i>	Executive Summary helps clients quickly understand the note's relevance. • This section consists of two subsections: Key Findings, Recommendation(s). • Ideal Length: Maximum 300 words. Key Findings: • Include a bulleted list of 2 to 4 insights that the client can find in this piece of research. • Present these as the main challenge(s), business issue(s), common mistakes, opportunities, trends, survey data results or something else relevant to your piece. Recommendation(s): • Relate the findings and recommendations to the end-user client. What is challenging about making decisions in this market? What actions should end users take given the dynamics of the market, and benefits and risks it poses? • Directly address the client problem/opportunity/situation identified in the summary. • Be specific and action-oriented. Avoid platitudes. • Ideal Limit: 4 bullet points

Market Insight

Strategic Planning Assumption(s) Optional	Enter relevant SPAs here if your research team uses them. For guidance on using SPAs, see The Art of Writing Good SPAs/Predictions.
Analysis Required	Organize the content into a single argument using a simple, clear structure that clearly identifies the audience. - Ideally, add two to four subheads to break up the text and allow the client to navigate the document easily. - If appropriate, use figures and charts to help explain and present your analysis.
Background and Context Optional	Profile and describe the market, technology, competitor, customer or (HTI) strategies discussed in this research. Ideal Length: Up to 500 words
The Impact Optional	- Identify the implications/impact for your audience. Specify how you expect these effects to be manifested and when you expect them to occur (now, next year or five years from now). - Explain why these manifestations are important for your audience — do they create new opportunities, new threats or a new customer buying center? - Be sure to specify “who” is affected (vendor types, regions, countries, verticals and roles/functions). Ideal Length: Up to 2,000 words
Conclusion Optional	Discuss what your audience should do about what you've told them. For example: - What parts of their strategy or business model they should reassess — product, competition, go-to-market — to be able to grow in light of the key findings and takeaways. - What things they should think about/assess in the short term as a result of your analysis (this year and next year) versus the long term (five years out). Ideal Length: Up to 500 words
Contributors Optional	Use this space to acknowledge associates who provide meaningful input, advice and/or raw material in the creation of research content but who are not co-authors/co-creators. Required - Recognize associates who contributed but are not co-authors. - Format: first name + last name; list alphabetically by last name, separated by commas. Only include associate names. HARD RULE - Ensure correct spelling; no nicknames.
Acronym Key and Glossary Terms Optional	- Include market and technology definitions, if needed. - Refer to this link to see Gartner’s standard definitions Glossary
Evidence Optional	Use the evidence section to provide relevant background for the entire document.

Market Insight

	• No Market Insight document should be written without first doing secondary research to see what has been written elsewhere in Gartner and what is available externally. • Share what research and/or expertise qualifies Gartner to address your topic. For example, internal Gartner evidence, external sources, vendor frameworks, surveys, case studies, anecdotes, inquiries and interviews you conducted for this note. • If you find nothing specific to your note other than analyst experience, some examples of how to accomplish this are statements like: ◦ “Based on ongoing multiple interactions with leading HTTP vendors ...” ◦ “Based on secondary research and interactions with XXX ...” ◦ “The advice provided in this document is built from constant scanning of the market, and from the aggregation of analysts' experience and interactions with vendors.”
Notes Optional	• Use notes to add non-essential detail or context • Replace the text “Notes” with this format: “Note X: [Title].”

Multimedia/Components

For full guidance on how to use graphics and components, see the [Consumability Playbook](#).

Graphics	Add graphics as needed to visualize detailed evidence or illustrate an important, complex or novel concept (per Principle 5 of the Consumability Playbook). Use these resources if helpful: • Launchpad • Adding Graphics in CPP
Video/Audio	Where relevant, you may embed the Video Component as per the Video Guidance. Note to Authors: Author-produced video production model was retired in January 2025 and all client-facing video content must now align with practice-approved multimedia programming and the produced in partnership with BTI Studio Multimedia. Before planning any video: • Obtain approval from practice EMT and COR to ensure it fits within the group's multimedia strategy. • Collaborate with BTI Studio to determine the next steps in production. Once your approved video is ready, partner with BTI Studio to embed the video in your document.

Downloads	Downloads are not permitted for this content type at this time. Contact methodologies@gartner.com to seek approval if you believe you have identified an urgent use case.
Case in Point	Not permitted for this content type.

Notifying Complex Vendor Lead Analysts

If you profile, analyze or otherwise discuss a vendor that features in our [Complex Vendor Program](#), you must add the assigned Complex Vendor Lead Analyst (VLA) as a mandatory reviewer early in the process — ideally as soon as the item is planned in CPP.

Consult the [full list of Complex Vendors](#).

Additional Resources

Resource	Description
Content Essentials	Content Essentials is a set of seven criteria identified through client feedback that support quality content and strengthen client retention.
How to Write Good Titles, Summaries and Executive Summaries	Detailed instructions on how to write good titles, summaries, and executive summaries.
Contextualization Availability by Content Type	Details the contextualization options available for each content type
Content Type Life Cycle Management Options	Details the lifecycle management options(default, extendable, evergreen, etc.) for all content types
The Art of Writing Good SPAs/Predictions	This collateral provides a comprehensive guide on crafting good SPAs/Predictions
External Review Policy	This policy outlines general guidelines for when external review is required.
Gartner's Research Contribution & Attribution Guidelines	This document defines the Gartner associate roles involved in content creation and outlines their attribution on Gartner.com.
Content Help Center	Provided tips, tools and best practices for planning content before you begin.

Market Insight

[AskMethodologies](#)

AskMethodologies is a knowledge base that covers topics such as contextualization, policies and content lifecycle management, and it's the first place associates should go with any Methodologies-related questions.

Instructions to Editor

Market Insights is a short-form document type that provides background information about a market or technology. It is primarily used when analysis does not fit into more-defined High Tech and Invest (HTI) role-based content types.

Your editorial responsibilities for this document type:

- The Summary must not exceed 300 characters (including spaces). The role should be stated in the Summary.
- If the contributor's section is present, only names should be included (no additional details, nicknames or team names). **Format:** [first name] [last name]; *list alphabetically by last name, separated by commas.*
- Case-in-points and downloads are not permitted in this content type.
- Reference the supplemental [Authoring Kits](#) for all Emerging Tech and Trends (ETT) content.

Document Update History

Month of Document Update	Notable Changes
December 2025	• Minor updates to reflect change from R&A to BTI. • Good Examples refreshed.
November 2024	The Recommended Reading section has been moved from the canvas into an Add-On panel. See this page and this user guide for reference.
September 2023	Removed KI lead-in line requirement for Recommendations section. The Key Facts Sidebar has been edited to remove the practices and any superfluous text, and to add links to the Content Type Life Cycle Management Options and the Content Help Center.
April 2023	Added new, optional Contributors section.
December 2020	• Contextualization options updated • embedded video option added
June 2020	• Contextualization options added
